| IN WA & WM | 35 |

## STOP THE FLU, IT'S UP TO YOU!

WHEN COVID-19 MEETS FLU SEASON
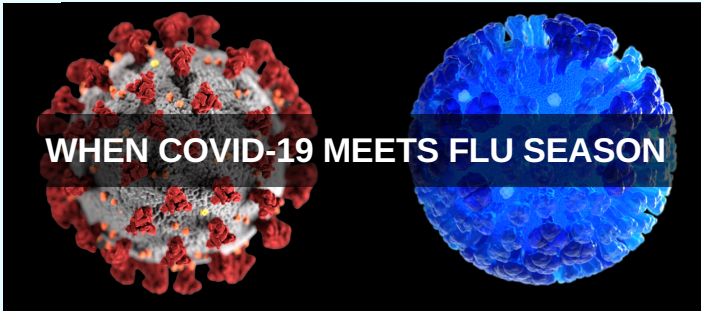

Flu Season is right around the corner. Are you prepared? Because of the COVID-19 pandemic, **reducing the spread of respiratory illnesses, like flu** this fall and winter is *more important than ever.*

Routine vaccination is an essential preventive care service and **should not be delayed** because of the pandemic. However, where and how people get a flu vaccine might be different than in years past. Plan ahead and schedule an appointment to keep you and your family safe.

Do you normally attend a flu clinic hosted by the West Allis Health Department? This year, to keep the community and department staff healthy, the West Allis Health Department is organizing a **drive thru flu clinic** for residents in mid-October. Stay tuned for more details.

## WHEN IN DOUBT, GET A TEST

Do you feel symptomatic? Were you recently around a large group of people? Do you have an upcoming family event? **Get a COVID-19 test.**

Testing is a good way for health officials to track the spread of COVID-19 and slow transmission from one person to another. So...if you think you might have contracted the virus, get tested.

A negative test result doesn't necessarily mean you don't have the virus. After exposure, the virus can develop in your body for up to 14 days and your test may not return back as positive right away. Be mindful of your possible exposure date and monitor symptoms.

There are many testing locations in Milwaukee County. Of the many options, the National Guard is a great choice for many reasons. They offer two FREE drive-thru testing sites open six days a week plus a **hotline** to call for **test results at 866-419-6988**.

**MILWAUKEE - UMOS**
**2701 S. Chase Ave, Milwaukee, WI 53207**
